

ML-Class w164

Wide Body

Our wide aero kit fits the 2009 ML (w164) model. It has been designed to enhance both esthetics and performances. Larger openings in the bumper and hood vents help to get better engine cooling while the "wide-body" fender flares a low to mount larger wheels. The front bumper set features LED indicators and directional foglights bringing your car to a new high-tech level, while the rear carbon fiber diffuser combined with the double twin-tip exhaust achieve the overall aggressive look of the vehicle.
